

Bi-Flex™ Testimonials

We asked a group of sleep apnea sufferers who had been using traditional bi-level therapy for a number of years, to try Bi-Flex. Here is what they had to say.

“I like having the ability to adjust the comfort settings until I find one that is satisfying.” – Edward S.

“I experience longer periods of uninterrupted sleep which helps to improve my general health.” – Edward S.

“Bi-Flex is a lot quieter and more comfortable than regular bi-level. The Bi-Flex eases you into breathing... It provides sort of a cushion which makes breathing more comfortable.” – Sally W.

“With Bi-Flex, I don't feel like I am fighting the air pressure. It adjusts to make breathing more comfortable. Before, the air pressure would awaken me and I would have to take my mask off, take a couple of deep breaths and sometimes even take a walk downstairs. Now, if I wake up, I just stay in bed with my mask on and relax because I know the Bi-Flex machine is going to work with me. I close my eyes and I'm right back to sleep.”
– Gary G.

“I used to wake up 5 or 6 times a night. With Bi-Flex, I enjoy a more restful sleep. I am not waking up as much.”
– Gary G.

“I have tried five bi-level machines in the past two years and I'd take Bi-Flex over all five machines – definitely... The Bi-Flex machine is the best I've ever used.” – Gary G.

“Thanks to Bi-Flex, I have more awake time which makes life a little bit better. The sleep I get now is a different sleep than with the other machine. I sleep a shorter amount of time but wake-up with just as much energy. It's made my sleep better, which makes me better” – Gary G.
